DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

1. Claims 5-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot serve as a basis for other multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Regarding claim 1, the phrase "preferably" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).
4. Claim 1 contains two preambles, "comprising" in line 3 and "characterized in that" in line 9 are both preambles. It is unclear which preamble is the actual preamble.

5. Claim 2 recites the limitation "the drag element" in line 3. There is insufficient antecedent basis for this limitation in the claim. Is this meant to be "the at least one drag element"?
6. Claim 3 recites the limitation "each available input means". It is unclear what is "available".
7. Claim 3 recites the limitation "one drag element" in lines 1-2. It is unclear if the "one drag element" is the same as or different than the "at least one drag element".
8. Claim 4 recites the limitation "the drag element" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim. Is this meant to be "the at least one drag element"?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Holtje (US 5,692,740). Holtje discloses at least one stacking device (12) that rotates about an axis of rotation (14) comprises at least one drag element (28a) that is on a radial exterior side of at least one stacking member (16a), and at least one input means (18a).
